Again very importantly applicants must provide the Examiner with a copy of all of the non-patent (i.e. literature references) cited in the IDS statement. The Examiner does not have them even though they were filed in the parent case.

Further restriction is made herein. This is done because the W, X, Y containing ring of the bicyclic moiety contains a multitude of possible hetero rings since the above variables are selected from CR6, NR7, O or S. The limitation that 1 or 2 of the above must be other than CR6 does not greatly reduce the number of different structures.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 44-72, drawn to compounds and their pharmaceutical compositions and methods where 1 or 2 of X, Y and Z is O or S and the other(s) C, classified in class 549, subclass 436, e.g..
- II. Claims 44, 48, 50-64 and 66-72, drawn to compounds and their pharmaceutical compositions and methods where 1 or 2 of X, Y and Z are N containing and the others are C containing, classified in class 548, subclass 362.5 e.g..
- III. Claims 44, 49, 50-64 and 66-72, drawn to compounds and their pharmaceutical compositions and methods of use where 1 of X, Y and Z are N and 1 of the others is O or S, classified in class 548, subclass 217 e.g..

Restriction is proper because of the above reasons and because of the different classification.

Art Unit: 1625

Election of a single disclosed species is also required in case no generic claim is found to be allowable.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
